1 Introduction

This document describes the overall picture of MCA website.

1.1 Brief History

MCA holds a huge collection of Malayalam movies for many years. They had stood up a **ftp** server and everything was fine. One day I was searching for an old Mohanlal-movie(though I'm not a fan ☺), I couldn't find it out, even it was actually there. Yes, it was not that well organized. So the idea come from the fact that to bring something better to navigate(of-course movies). I was just a newbie to web-development other than those simple **html** only pages made on school days. I started coding this project back in 2015 January and it took me more than two months to reach a point that it can be launched, as I was doing it on my free time. MCA council gave me all the support on this especially *Sharan, Ashwin, Ramzan, Jayasankar*. Website initially launched on March 15, 2015 while people and library tabs left to code.
